Dear Internship Coordinator,

I am a junior undergraduate student at KIET Ghaziabad, I am writing to apply for summer internship. I am very intrigued by the pace at which your company is growing and the challenging and exciting work which you guys have been doing. I want to contribute with my hard earned skills to your company and learn further in the process.

I am well versed in CSS, JavaScript, HTML, PHP, and Python. I have developed various websites using different frameworks such as AngularJS and React, using libraries such as jQuery, bootstrap etc and using tools such as bower, grunt, git and yeoman.

I am interested in graphics designing and all the graphics which my websites use are completely made by me. The tools which I use are Adobe Illustrator, Adobe Photoshop and Adobe InDesign.

I have been regularly participating for the past two and a half years in algorithmic contests hosted on websites such as Hackerrank, Codeforces etc. I have strong knowledge of algorithms and data structures. All of my profiles and projects can be found at <http://shubhamsingh.info> .

One feature about me I am proud of is that I can learn new technologies very fast and can deploy completed website/modules in a very short time. And that is why I think I am suitable for your fast paced company. I have a knack for perfect completion of job and I keep tweaking unless it's perfect. I won't consider project as something to get over with, I will put in the time and assure its quality.

Thank you for your consideration.

Sincerely,
Shubham Singh.
